

## PROJECT 09

# A hand-crafted photo stand to add a personal accent to a special memory

A special photo deserves a frame that helps recapture the joy of the moment. Using fabric and paper in your favorite patterns and colors, along with your own design ideas, you can create a frame that accents the happy feelings at the instant the shutter was pressed. What better way to convey joy than with a hand-made photo frame?

# Material

Outer dimensions (when finished): 5.00" x 7.09"  
Paper – 5 kinds; fabric – 1 kind  
Frame: 2.86" x 3.94"  
Holder (stand): 3.98" x 6.30"  
Beads, buttons, antique lace, glue, high-tack adhesive fabric support sheet  
For the photo holder, use the ornament on page \_\_\_. (Indicate the size.)

Use an embossing stylus or a blunt round-tipped awl to curl the flower petals so that they stand out instead of lying flat makes the photo stand even more eye-catching and appealing. Curling the petals is done most easily on a soft surface.

Function: Scan to USB

1 Affix a support sheet to the mat for fabric and get ready to cut the fabric. Cut the fabric using Seam Allowance.

Function: Seam Allowance

2 Replace the mat for fabric with the mat for paper. Clear the Seam Allowance setting and cut 1-mm-thick paper.

Function: Scan to Cut Data

3 Using Scan to Cut Data, group together and cut 4 built-in patterns of flowers and 2 for the photo holder. Then cut the other built-in pattern shapes.

Built-in patterns: BA-A014, BA-A014, AR-K027, AR-A010 x 4, AR-A021 x 2, FO-A003

4 Iron the fabric folded over the base paper. Apply glue at the folds and attach the fabric so that it extends slightly beyond the edges of the base paper.

5 Attach all the cut pieces and the photo to the fabric-covered base paper of step 4.

6 Place the finished photo stand on the holder.
